

Crypto Punk ERD (draft 1-03-2021)

machine_learning_df	
punk_id	object
type	object
accessories	object
type_ML	float64
glasses_ML	float64
normalized_bitmap	object
image_bitmap	object

Need to clean up by dropping unnecessary columns: "image_bitmap", "type" and "accessories"

Need to add "punk_id" to this table and use it as primary key

bitmap_df	
normalized_bitmap	nparray
image_bitmap	nparray

Individual .png files

Need to clean up by dropping unnecessary columns: "type_ML" and "accessories_ML"

crypto_punks_df	
punk_id	object
type	object
accessories	object
type_ML	float64
glasses_ML	float64

categorized_accessories_df	
accessory	object
counts	int64
class_group1	object
class_group2	object

accessories_csv	
accessory	string
counts	integer
class_group1	string
class_group2	string

df	
txn_type	object
from	object
to	object
date	datetime64
timestamp	datetime64
source	object
eth	float64
punk_id	integer64
from_wallet_address	object
to_wallet_address	object
type	object
accessories	object

Need to clean up by dropping unnecessary columns: "type" and "accessories"
